Profile Summary

Java Full Stack Developer with 3 years of experience at Sony India Software Centre in developing and maintaining enterprise applications. Dedicated and disciplined professional with strong problem-solving abilities, ownership, and a proactive approach towards taking responsibilities and delivering high-quality solutions aligned with business requirements.

Technical Skills

Backend Technologies: Java, Spring Boot, Spring MVC, Hibernate/JPA, RESTful APIs, Microservices, Monolithic Architecture

Frontend Technologies: Angular, TypeScript, RxJS, Bootstrap, HTML5, CSS3, JavaScript

Database Integrations: Oracle SQL, CRM Dynamics, Salesforce API Integration, Enterprise Application Integration

Cloud Tools: AWS Athena, AWS OpenSearch, AWS CloudWatch, Git, CI/CD, Deployments

Core Expertise: Scalable Application Development, Enterprise Application Development, Responsive Web Application Development, REST API Development, Microservices Development.

Work Experience

Full Stack Developer (Java & Angular)
Sony India Software Centre

Aug 2023 – Present – Bangalore

Project: Sony Warranty Registration & Product Data Management

- Developed and maintained a monolithic enterprise application for Sony product warranty registration, sales report generation, and customer data management using Java, Spring Boot, CRM Dynamics, HTML, CSS, and JavaScript.
- Developed backend services, REST APIs, and automated batch jobs for warranty processing, customer onboarding, and sales report generation, significantly reducing manual business efforts.
- Integrated multiple enterprise applications and third-party systems to enable seamless business communication and efficient data flow across platforms.
- Ensured high-quality and reliable application delivery by performing root cause analysis, fixing critical issues, and implementing stable and bug-free solutions in production environments.

Project: Sony Pictures Content Management Platform

- Worked on a large-scale microservices-based enterprise application used for managing sensitive movie and business content data for Sony Pictures.
- Designed and developed secure backend services, REST APIs, and system design components using Java and Spring Boot with Oracle SQL integration.
- Implemented role-based access control and permission management functionalities to ensure secure access for Admin, Client, and business users across application modules and APIs.
- Integrated Salesforce APIs and multiple enterprise applications to support business workflows and seamless data exchange across platforms.
- Participated in end-to-end product deployment cycles across development, staging, and production environments, ensuring smooth releases with minimal downtime through CI/CD pipelines.
- Worked extensively with AWS services including transaction queues, deployments, and CloudWatch log monitoring for application maintenance and operational activities.
- Utilized AWS Athena and AWS OpenSearch for handling large datasets, improving search capabilities, and optimizing application performance.
- Contributed to multilingual translation features and regional user support to enhance usability across multiple geographic locations.
- Collaborated with business stakeholders to understand requirements and deliver scalable, secure, and high-quality solutions for sensitive business applications.

Achievements

- Received multiple Spot Awards and client appreciation for delivering high-quality, innovative solutions and meeting critical business requirements.
- Recognized for ownership, consistency, discipline, and strong problem-solving abilities in delivering enterprise applications.

Languages

- Tamil (Native)
- English (Professional Proficiency)

Education

B.E. Electronics and Communication Engineering - V.S.B Engineering College, Karur 86%	2019 – 2023
HSC - Bharathi Vidhyalaya Matric Hr. Sec. School, Tiruppur 86%	2018 – 2019
SSLC - Bharathi Vidhyalaya Matric Hr. Sec. School, Tiruppur 83%	2016 – 2017

Professional Strengths

- Strong ownership mindset with responsibility-driven delivery approach
- Ability to quickly understand business requirements and translate them into technical solutions
- Experience working in large-scale enterprise systems with production responsibility
